

About Help India Online Foundation Family

50, Arpit Nagar, Gandhi Path, Vaishali Nagar, Jaipur (Raj.) - 302021

Help India Pariwar is a world record holder organization. This seed of Help India was sown by our Founder Mr. Jagdish Ji Pareek with a dream of making India a World Guru in the year 2018. Starting with a small seed, Help India has become a Banyan tree whose roots extend from north to south and east to west. Help India was started to provide a platform for social assistance to the people. But when it is seen that people are not able to fill their help forms well, there is a lack of good health services, the youth are not getting better employment. In such a situation, Help India established Education Wing, Preventive Health Wing, Rojgar Wing, Help Wing, Social Entrepreneurship for the facilities of the people in various fields.

Education Wing - Today, the Education Wing of Help India has designed 8 core education courses for the all-round development of children, which are not only teaching and explaining important topics to children as well as courses such as robotics and artificial intelligence are also being taught. For mental development as well as physical development, children are given training in gymnastics, Marchel arts, and various sports. For online education, 10 thousand books are available on the Digital Library of Help India, where you can read any book related to any subject. Along with this, Help India has also launched some digital professional courses which you can learn by increasing your skill and giving better direction to your career, and make your future bright.

Employment Wing - The biggest challenge is to get a good job in front of a large number of the young population in the country. Keeping this in mind, Help India has also created a platform for employment along with skill development where more than 1000 companies are listed and a large number of youth have got jobs from here.

Our country is the fastest growing economy in the 21st century today and there are a lot of employment opportunities but despite all this, unemployment is very high in our country and its biggest reason is lack of skill i.e lack of efficiency. People do not have the skills that can help them get good employment. Therefore, the employment portal of Help India also provided opportunities to the youth to improve their skills. Diploma courses in every field are available here, where they can increase their skills by applying online and can get jobs by applying in jobs on the employment portal itself.

Help India has now given a golden opportunity for people to become self-reliant, on the call of our Prime Minister to build self-reliant India. Capital is the first and foremost requirement in starting any business. Due to lack of capital, many people are unable to do business, in such a situation, Help India has worked as a bridge to get loans from banks to solve this problem. Capital is no longer a problem to trade and a person can make himself self-sufficient by opening home galleries and depots even in remote areas.

Preventive Health Wing - In the treatment system that is prevalent today, after getting sick, the disease is detected and treated, which we call Allopathy. There is physical suffering in this as well as a large amount of family capital is also spent. Keeping this in mind, Mission Preventive Health was started in which people are being trained in preventive health. So far, over 6 lakh people have received training and government certificates. Help India has set a target of creating 1 crore Preventive Health Consultants by the day of Yoga on 21st June.

About Help India Online Foundation Family

Social Entrepreneurship Wing - Help India launched B2ME Pvt. Ltd. With the aim of making India self-reliant. With the help of, a platform has been created where the small scale industries on the e-commerce website can easily make a profit by selling the products manufactured in the cottage industry and make the country strong and self-reliant through self-employment. In B2ME, a good range of preventive health products have been prepared to keep health in mind.

Digital Help Wing - The main objective of Help India was to create such a model of social support for the people, where everyone can help each other so that Help India has provided a platform of digital help where all People together help a needy person with little help. So far, the digital help of Help India has helped more than 600 daughters get married.

E-Governance Wing - There has been a rapid change in technology in the 21st century, and along with this, the manner of the transaction of people has also changed. In the last few years, people have started making digital payments instead of cash payments. Help India has also launched its pay facility, through which payment can be made anytime.

Today, Help India has become not only an institution but an idea that is rapidly reaching person to person. In the last 2 years, Help India has set new records of success. The biggest force behind the success of Help India is you. You are the vigilante watchdog of Help India, who has not only conveyed the dream of Help India to be the World Guru of India but has also lived for it by assimilating it within himself. Everything that Help India has achieved today is a beginning, in the next few years, we are going to improve our services further and make the resolve to make India a global leader come true.
